

Northwest. It is somewhat unusual that cool summer temperatures here were associated with sunny and dry weather. In fact, August was the sunniest month ever observed in Spokane, Wash., and Tatoosh Island, Wash., received the lowest amount of precipitation since 1916.

## Water Supply Forecasts for the Western United States

Published monthly from January to May, inclusive. Contains text, map, and tabulations of water-year and seasonal runoff forecasts for the eleven Western States, by Weather Bureau, Soil Conservation Service, and the State of California. For copies of the 1956 forecasts apply to River Forecast Center, Weather Bureau Office, 712 Federal Office Building, Kansas City 6, Missouri.
